Address: HR Vobon, South Thakurpara, Cumilla

EXPERIENCE

Internship (Web Designer)

BAIUST ICT Wing

June 2020 – August 2020

PROJECTS

Patient Information System- [Code Link](#)

Technology: HTML, CSS, Bootstrap, jQuery, PHP, Laravel.

Features: This website will make a bridge between doctor & patient. A patient will give their appointment to a doctor & also see their serial number. Patient will go to a doctor in time & doctor's assistant ask the patient about their problem, then refer to the doctor. The doctor prescribes the patient and is stored in database. Patients or doctors anytime can access the prescription.

Chander HUT ([Website](#) || [Code-Client](#) || [Code-Server](#))

Technology: JavaScript, React.js, Node.js, Express.js, Bootstrap, Material-UI, MongoDB, Firebase Authentication, Heroku.

Features: This is an online e-commerce shop where users can order grocery items as their need. The user can see all the previous bookings of himself. Admin can delete products & add products according to product stock.

Repair HUT- ([Website](#) || [Code-Client](#) || [Code-Server](#))

Technology: JavaScript, React.js, Node.js, Express.js, Bootstrap, Material-UI, MongoDB, Firebase, Stripe Payment, Heroku.

Features: This is an electrical item repairing store. Users can order the service which they need, and they also give reviews about the service. Admin can edit service, add service & delete service. Also, the admin can handle booking list & their status.
